Driving to clean mobility

Fountain Fuel 10 May 2023

Sander Sommer
Managing Director

Driving together to clean mobility

- Allego is proud EV-charging partner of Fountain Fuel
- Combining strengths for clean mobility: EV and hydrogen
- Unique collaboration between public and private

Driving to clean mobility

EU ban: by 2030, CO2 emissions from cars and vans to be cut by **55%** compared to 2021; by 2035, all new cars and vans to operate with zero emissions.

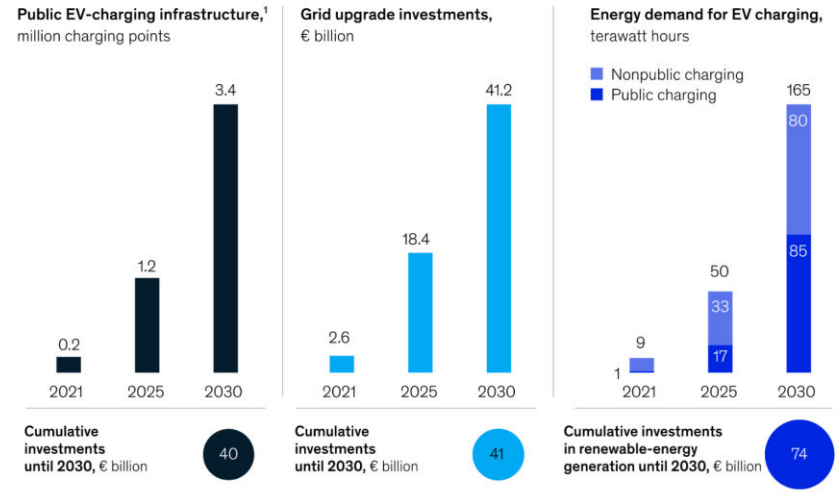

The **EU is the global frontrunner** in the adoption of EVs: its member countries are responsible for more than a quarter of the world's **EV production**, and EVs represented roughly 20 percent of its new-car sales in 2021.*

EV market forecast Europe: 14 million EVs by 2025, 33 million EVs by 2030 (low estimates), 40 million EVs (high estimates).**

This will require a major development of Europe's EV-charging infrastructure.

Electric vehicles will require a synchronized rollout of new charging-point infrastructure, power grid upgrades, and renewable-energy capabilities.

Infrastructure, grid, and energy requirements for growth of electric vehicles (EVs) in Europe

¹Reflects utilization-oriented scenario described in the European Automobile Manufacturers' Association (ACEA) report; includes charging points for passenger and commercial vehicles.

What do we do?

A network with EV charging solutions for almost 10 years

Easy, reliable and efficient clean mobility

- We deliver and operate turn-key charging sites
- We purchase and sell 100 % clean power
